Senior Product Manager | Enterprise Product Strategy | Digital Transformation | Customer Experience

PROFESSIONAL SUMMARY

Senior Product Manager and enterprise product leader with nearly 30 years of Verizon experience across product strategy, customer experience, digital transformation, assisted digital platforms, self-service, and complex cross-functional delivery. Known for moving ambiguous, cross-functional initiatives into disciplined execution, connecting strategy, technology, operations, governance, and customer experience into a single coherent roadmap. Currently pursuing Director and Senior Director Product Management, Digital Transformation, and Principal Product Manager opportunities where that scope of ownership carries forward.

CORE PRODUCT AND LEADERSHIP COMPETENCIES

Enterprise Product Strategy | Digital Product Transformation | Customer Experience Modernization | Roadmap Ownership & Backlog Prioritization | Cross-Functional Leadership | Product Governance & Launch Readiness | Executive Stakeholder Alignment | Risk, Dependency & Decision Management | Engineering, UX & Architecture Partnership | Product Operations | Data-Informed Decision Making | Applied AI Fluency

PROFESSIONAL EXPERIENCE

VERIZON | 1996 – 2026

Nearly thirty years of enterprise product ownership at Verizon, moving through consumer digital platforms, self-service technology, and enterprise-scale customer experience and transformation initiatives.

Senior Product Owner / Product Manager, View Together

- Own product strategy and roadmap for View Together, an assisted digital and co-browse customer experience platform supporting approximately 15 million annual customer interactions across retail and contact-center channels.
- Lead backlog prioritization and cross-functional coordination across engineering, UX, operations, and retail teams to modernize assisted purchasing and support journeys while maintaining platform stability.
- Drive launch readiness and governance for platform releases, partnering with legal, compliance, and operations to protect customer transparency and ensure controlled rollout.
- Incorporate field feedback from retail and contact-center teams into production monitoring and defect prioritization, protecting the reliability of customer-facing purchasing and support journeys.
- Manage dependencies and align product, engineering, and operations stakeholders on decisions needed to deliver platform enhancements on committed timelines.

Product Owner, Verizon Assistant

- Owned product strategy and roadmap for Verizon Assistant, a digital self-service platform giving customers direct access to account support and service resolution.
- Partnered with customer care and operations teams to identify customer needs and prioritize self-service capabilities that reduced dependency on live support channels.
- Used adoption and usage analytics to guide roadmap decisions and prioritize the capabilities with the greatest customer impact.

Product Owner, Verizon.com Email Platform

- Owned full product lifecycle for Verizon.com's consumer email platform, partnering with engineering and operations to maintain reliability and service continuity for customer communications.
- Coordinated cross-functional teams to manage platform stability and resolve customer-facing issues, sustaining a dependable communications experience.

Product Manager, Consumer and Small Business Solutions

- Managed a digital product portfolio serving consumer and small-business customers, prioritizing investment across competing initiatives based on customer need and business value.
- Aligned business, technology, and operations stakeholders to simplify product and customer experience processes across the portfolio.

EDUCATION

Master of Science (M.S.), Microcomputing, University of Puerto Rico

CERTIFICATIONS AND PROFESSIONAL DEVELOPMENT

- Google AI Professional Certificate, Google / Coursera, 7-course program (May 2026)
- Google AI Essentials
- Microsoft Azure AI Fundamentals (AI-900)
- IBM AI Fundamentals
- ISACA AI Fundamentals

Throughout nearly 30 years at Verizon, Tomas has consistently adapted as technology, customer expectations, products, and operating models evolved. That same pattern continues today through AI-assisted research, workflow automation, product analysis, and modern engineering practices, applied as the newest capability in an established pattern of learning, judgment, and execution rather than a career change.
